

October 2011

To whom it may concern,

RE: Shaw Electrical Systems Pty Ltd

I am pleased to provide the following reference for Shaw Electrical. Shaw Electrical was engaged as the electrical, security and communications subcontractor to Hansen Yuncken for the \$20m Manilla Hospital Redevelopment.

The Manilla Hospital Redevelopment involved the demolition of existing, and full construction of a new hospital including ED, acute wards, allied health services and residential aged care for NSW Health Infrastructure. Coffey Projects was appointed by Health Infrastructure as Project Manager and Contract Administrator for the delivery of the facility.

During the extensive staged construction period I received numerous feedback from Hospital and Head Contractor representatives on the performance of Chris and his team. In particular the Head Contractor and hospital maintenance representatives were impressed by the neatness and quality of Chris's installations. I was equally impressed by Chris's willingness to assist and accommodate project changes without impact on his program of works.

Chris and his team gained great experience and understanding of the intricacies of NSW Health projects and is also able to provide the necessary AMP Netconnect certification required by Hunter New England Health.

I would recommend Shaw Electrical for any similar project.

Josh Fullerton

Project Director
